PURINA® PRO PLAN® VETERINARY DIETS

FELINE & CANINE RANGES

Your Pet, Our Passion.®

PURINA
PRO PLAN
 VETERINARY DIETS

30 YEARS OF SCIENTIFIC INNOVATION IN PET NUTRITION

Nestlé PURINA®'s global team includes over **500 scientists** and **petcare experts** that have **created** many successful **veterinary tools** and **nutritional innovations** that deliver significant **clinical advantages**.

We are fully committed to investing in the development of new breakthrough technologies that can both be applied to our diets and further advance the scientific knowledge of canine and feline nutrition and specific metabolism. Some of our innovative tools include The **Purina® Body Condition Score**, the **Canine Cognitive Assessment Scale** and the new **Tailored Feeding Calculator**.

We **control** our entire **value chain** and use **high-quality ingredients**, carefully selected to safely deliver advanced nutrition with **proven results**.

We're committed to **sustainability** and our new, **designed to be recyclable** packaging* with a modern, premium look, is our first step forward.

Our Pro Plan® Veterinary Diets range is **concise, science-based** with **effective formulas**, proven to **support** the management of **specific health conditions** of cats and dogs.

Some of our greatest product innovations include:

PURINA® PRO PLAN® VETERINARY DIETS EN GASTROINTESTINAL™ – first diet to incorporate Medium Chain Triglycerides (MCTs) in canine diets to help in the nutritional support of gastrointestinal issues.

PURINA® PRO PLAN® VETERINARY DIETS HA HYPOALLERGENIC™ – first diet to use low molecular weight protein nutrition which helps diagnose and manage the clinical signs of food allergy.

PURINA® PRO PLAN® VETERINARY DIETS OM OBESITY MANAGEMENT™ – first diet to use high protein levels to help maintain lean body mass during weight loss.

PURINA® PRO PLAN® Hydra Care™ – a new concept in hydration for cats.

PURINA® PRO PLAN® FORTIFLORA® – the first probiotic supplement, containing the SF68® strain exclusive to Purina, clinically proven to help promote intestinal health and balance.

*This claim applies to dry packs of 5kg or less and cans. The recycling stream availability of this bag may vary in each country. Please check on www.purina.eu/packaging

FELINE Range 	
PURINA® PRO PLAN® VETERINARY DIETS	KEY BENEFITS
NF RENAL FUNCTION™ EARLY CARE	Formulated with moderate levels of high-quality proteins and early restricted level of phosphorous for the support of renal function in case of IRIS stages 1 & 2 of chronic renal insufficiency.
NF RENAL FUNCTION™ ADVANCED CARE	Formulated with restricted levels of high-quality proteins and low level of phosphorous, with increased levels of EPA & DHA for the support of renal function in case of IRIS stages 3 & 4 of chronic renal insufficiency.
UR URINARY™ St/Ox	With St/Ox urinary security and low level of magnesium to help dissolve struvite and oxalate crystals and stones, and also helps to reduce the risk of struvite stone recurrence.
EN GASTROINTESTINAL™ St/Ox	Formulated with highly digestible ingredients, prebiotics and moderate fat levels to help reduce workload of the compromised gut and help improve intestinal health.
HA HYPOALLERGENIC™ St/Ox	Formulated with single hydrolysed protein and purified carbohydrates sources to help avoid allergic reactions.
HP HEPATIC™ St/Ox	Formulated with moderate level of high quality proteins, high level of essential fatty acids, high energy and restricted levels of copper for the support of liver function in the case of chronic liver insufficiency.
OM OBESITY™ St/Ox MANAGEMENT	Formulated with high levels of protein, low in calories and with high levels of natural fibre, proven to reduce excessive body weight and maintain optimal body weight.
DM DIABETES™ St/Ox MANAGEMENT	With low level of rapid-glucose releasing carbohydrates and optimal levels of fibre to help reduce blood glucose variation, and increased levels of vitamin E to reduce oxidative stress.
CN CONVALESCENCE™	With high energy density, high concentrations of essential nutrients and highly digestible ingredients for nutritional restoration and convalescence.

COMPLEMENTARY PETFOOD – SUPPLEMENTS

PURINA® PRO PLAN®	KEY BENEFITS
FortiFlora®	Guaranteed level of microencapsulated probiotic, proven to promote intestinal health, microflora balance and a strong immune system in cats of all ages.
Hydra Care™	Formulated to increase water intake and urine dilution

ISFM recognizes Purina's nutritional contribution to feline well-being.

URINARY

- Dissolution of struvite uroliths
- Reduction of struvite urolith recurrence
- Helps reduction of oxalate urolith recurrence
- Idiopathic cystitis
- Feline Lower Urinary Tract Disease (FLUTD)

KEY BENEFITS

- **With St/Ox urinary security** - to reduce the risk of urinary Struvite and Oxalate crystals and stone formation.
- **To help promote dissolution** of urinary struvite stones.
- **Moderate calories** to help maintain ideal body weight.

INGREDIENTS (DRY)

Chicken variety: Rice, wheat flour, dried poultry protein (16%, of which 50% chicken), corn protein meal, pea protein, dried egg, minerals, dried beet pulp, pork fat, digest, corn, fish oil.

Urine acidifying substance: phosphoric acid.

Ocean fish variety: Rice, corn protein, meal, wheat flour, dried poultry protein, soya protein, pea protein, corn, pork fat, dried salmon protein (4%), dried beet pulp, minerals, dried egg, digest, fish oil.

Urine acidifying substance: phosphoric acid.

INGREDIENTS WET (CAN)

Pork kidney, liver & lung, turkey, poultry heart & liver, rice flour, cellulose, minerals, various sugars.

INGREDIENTS WET (POUCH)

Salmon variety: Chicken, pork, salmon (7%), rice flour, minerals, cellulose, various sugars. Urine acidifying substances: calcium sulphate, sodium bisulphate.

Chicken variety: Chicken (17%), pork, salmon (4.5%), rice flour, minerals, cellulose, various sugars. Urine acidifying substances: calcium sulphate, sodium bisulphate.

NF RENAL FUNCTION EARLY CARE

- Help support early stages (IRIS stages 1 & 2) of chronic renal insufficiency
- Temporary renal insufficiency*
- The reduction of urate stones formation
- The support of heart function in the case of chronic cardiac insufficiency

*The recommended period for use shall be two to four weeks.

KEY BENEFITS

- **Moderate amount of high quality protein** to support renal function from the early stages and helps maintain an adequate muscle mass.
- **Early restricted level of phosphorus** to help slow the progression of chronic renal insufficiency.
- **With restricted level of phosphorus and added omega-3 fatty acids, potassium and antioxidants** to help assist on the early kidney care.

KEY NUTRIENT VALUES* (DRY) (POUCH)

Moisture	6.5%	80%

Metabolisable energy (ME) ¹	3794 kcal/kg	994 kcal/kg

INGREDIENTS (DRY)

Dry: Wheat flour*, corn*, rice*, wheat gluten*, soya meal*, corn protein meal*, pork fat, dried beet pulp, dried egg*, minerals, pea hulls, hydrolysed soya protein*, fish oil, digest*, yeast, xyllose.

*Protein sources

INGREDIENTS WET (POUCH)

Chicken: Meat and animal derivatives (of which chicken 8%), eggs and egg derivatives, cereals, fish and fish derivatives, oils and fats, yeasts, minerals, various sugars.

NF RENAL FUNCTION ADVANCED CARE

- Help support later stages (IRIS stages 3 & 4) of chronic renal insufficiency
- Temporary renal insufficiency*
- The reduction of urate stones formation
- The support of heart function in the case of chronic cardiac insufficiency*

*The recommended period for use shall be two to four weeks.

KEY BENEFITS

- **Restricted but high quality proteins** to help minimise loss of muscle and toxin formation and restricted phosphorus to help slow the progression of chronic renal insufficiency.
- **Increased levels of omega 3 fatty acids: with EPA and DHA** to help support kidney in the advanced stages of renal insufficiency.
- **Great taste** to satisfy cats with reduced appetite.

*Protein sources

INGREDIENTS (POUCH)

Salmon variety: Meat and animal derivatives, fish and fish derivatives (salmon 6%), cereals, vegetable protein extracts, yeasts, minerals, derivatives of vegetable origin, oils and fats, various sugars.

Chicken variety: Meat and animal derivatives (of which chicken 8%), fish and fish derivatives, cereals, vegetable protein extracts, yeasts, oils and fats, minerals, derivatives of vegetable origin, various sugars.

INGREDIENTS (MOUSSE)

Meat and animal derivatives, fish and fish derivatives, cereals, oils and fats, minerals, various sugars.

EN GASTROINTESTINAL

- Acute or chronic gastrointestinal disease:
 - Acute or chronic diarrhoea
 - Gastroenteritis and colitis
 - Malabsorption and/or maldigestion
 - Food intolerance
 - Inflammatory bowel disease
- Liver disease not associated with encephalopathy
- Convalescence

KEY BENEFITS (DRY)

- **Low residue:** easy to digest ingredients to help reduce workload of the compromised gut.
- **Limited number of protein sources*** to help minimise adverse intestinal reactions.
- **Added prebiotic (chicory inulin)** to help improve intestinal health.

*highly digestible ingredients.

INGREDIENTS WET (CAN)

Pork liver and kidney, turkey, rice, pork plasma, minerals, fish oil, cellulose powder, inulin.

With chicken: Pork (frozen liver & kidney, and dehydrated pork protein), chicken (4%), turkey, dried egg, rice flour, pea fibre, dried yeast, fish oil, minerals, various sugars.

With salmon: Pork (frozen liver & kidney, and dehydrated pork protein), turkey, chicken, salmon (4%), dried egg, rice flour, pea fibre, dried yeast, fish oil, minerals, various sugars.

HA HYPOALLERGENIC

- Cats with Adverse Food Reactions (AFR)
- Elimination diet for food trials
- Long-term management of food allergy
- Dermatitis and/or gastroenteritis associated with food allergy
- Inflammatory bowel disease (IBD)
- Food intolerance
- Exocrine pancreatic insufficiency (EPI)
- Hyperlipidaemia
- Lymphangiectasia
- Malabsorption
- Protein losing enteropathy
- Chronic diarrhoea
- Small intestinal bacterial overgrowth (SIBO)

KEY BENEFITS

- **Limited hydrolysed protein with low molecular weight** to help avoid allergic reactions.
- **Purified carbohydrates** to help avoid allergic reactions.
- **Great taste** thanks to high quality ingredients and appetite booster.

KEY NUTRIENT VALUES* (DRY)

Moisture	6.5%

DM DIABETES MANAGEMENT

- Diabetes mellitus
- Enteritis
- Chronic diarrhoea

KEY BENEFITS (DRY)

- **Clinically proven to help reduce insulin requirements** in diabetic cats.
- **Low in carbohydrates** to help reduce blood glucose variation.
- **Increased vitamin E** to reduce oxidative stress.

INGREDIENTS WET (CAN)

Pork heart, liver and kidney, poultry heart and liver, trout, salmon meal, cellulose, minerals, corn starch.

INGREDIENTS WET (POUCHES)

With chicken: Pork liver & kidney, trout, salmon and salmon meal, chicken (4%), greaves, plasma powder, cellulose powder, pork gelatine powder, corn starch.

With beef: Pork liver & kidney, salmon and salmon meal, trout, beef (liver) (4%), chicken, greaves, plasma powder, cellulose powder, pork gelatine powder, corn starch.

OMSt OBESITYTM MANAGEMENT

- Obesity
- Constipation
- Hyperlipidaemia
- Diabetes mellitus in overweight cats

KEY BENEFITS

- **High protein level** to help promote loss of body fat while maintaining muscle mass.
- **Low calorie diet** to help with weight loss.
- **Urinary Security** helps minimise the occurrence of struvite and calcium oxalate urinary stones, more common in overweight cats

HPSt HEPATICTM

- Liver failure
- Cholangitis / Cholestasis / Hepatitis
- Portosystemic shunt
- Hepatobiliary neoplasia
- Hepatic copper accumulation
- Hepatic encephalopathy

KEY BENEFITS

- **High energy** to help maintain a positive energy balance.
- **Adapted level of protein** to help reduce accumulation of toxins and maintain liver function.
- **High palatability** to encourage consumption and prevent malnutrition.

KEY NUTRIENT VALUES* (DRY)

CN CONVALESCENCETM

- Critical care nutritional support
- Peri-operative nutritional support
- Nutritional stress including:
 - Lactation
 - Malnutrition
 - Feline hepatic lipidosis

KEY BENEFITS

- **High concentrations of essential nutrients**
- **High energy density** to provide energy for recovery (60% energy from fat, 36% from protein).
- **High digestibility** formulated with highly digestible ingredients.

KEY NUTRIENT VALUES* (WET)

Moisture	77%
Protein	10.9%

* Highly digestible ingredients

FortiFloraTM

- Gastrointestinal disturbance and loose stools associated with microflora imbalance
- Loose stools associated with stress, antibiotic use or diet change
- Poor faecal quality in cats of all ages from weaning
- Palatability enhancement for cats with poor appetite

KEY BENEFITS

- **Contains a guaranteed level of a proprietary microencapsulated strain of viable probiotic (SF68) (5 x 10⁸ CFU/g).** The microencapsulation process enhances stability, guaranteeing levels of live beneficial bacteria entering the gastrointestinal (GI) tract.
- **Great taste:** Can be easily sprinkled on all cat foods with great acceptance.
- **Proven to help promote a strong immune system and help support intestinal health and balance for cats of all ages.** Contains the lactic acid bacteria *Enterococcus faecium* (SF68TM), at levels proven to support intestinal health and microflora balance in cats.

** Poultry and bovine gelatin.

Hydra CareTM

- Cats who could benefit from additional water intake.
The addition of PURINA[®] PRO PLAN[®] Hydracare to the cat's diet can help increase the consumption of water intake. These effects may offer benefits to cats in need of greater water consumption for their overall health.

KEY BENEFITS

- **Shown to increase total water intake and promote hydration***
- **Help to Increase urine dilution**
- **Great taste**

*Compared to cats consuming only water in addition to dry feeding.
Cats must consume at least 25 ml/kg of bodyweight daily for benefit.

CANINE Range 	
PURINA® PRO PLAN® VETERINARY DIETS	KEY BENEFITS
HA HYPOALLERGENIC™	Formulated with single hydrolysed protein and purified carbohydrates sources to help avoid allergic reactions.
EN GASTROINTESTINAL™	Formulated with highly digestible ingredients to reduce workload of the compromised gut and low level of fat to help minimise fat maldigestion.
OM OBESITY™ MANAGEMENT	Formulated with high levels of protein, low in calories and with high levels of natural fibre, proven to reduce excessive body weight and maintain optimal body weight.
NF RENAL FUNCTION™	Formulated with restricted levels of high-quality proteins and low level of phosphorous to support renal function in case of chronic renal insufficiency.
DRM DERMATOSIS™	Formulated with increased levels of specific nutrients, a selected and limited number of protein sources and high levels of omega-3 fatty acids to support skin function in the case of dermatosis and excessive hair loss.
DM DIABETES™ MANAGEMENT	With low level of rapid-glucose releasing carbohydrates, optimal levels of fibre and white bean extract to help reduce blood glucose variation.
UR URINARY™	Formulated with low level of magnesium and restricted level of high quality protein to help dissolve and minimise recurrence of struvite stones.
HP HEPATIC™	Formulated with moderate level of high quality protein, high levels of essential fatty acids and highly digestible carbohydrates to help reduce accumulation of toxins. It also contains restricted levels of copper to reduce build-up in the liver.
CN CONVALESCENCE™	With high energy density, high concentrations of essential nutrients and highly digestible ingredients for nutritional restoration and convalescence.

- Food intolerance
- Exocrine pancreatic insufficiency (EPI)*
- Hyperlipidaemia*
- Lymphangiectasia*
- Malabsorption*
- Protein losing enteropathy
- Chronic diarrhoea
- Small Intestinal Bacterial Overgrowth (SIBO)*

*Recommended uniquely for dry formula

KEY BENEFITS

- Single hydrolysed protein** with low molecular weight to help avoid an allergic reactions.
- Purified carbohydrates sources** to help avoid allergic reactions.
- With omega-3 fatty acids** to help maximise the natural anti-inflammatory process.

KEY NUTRIENT VALUES* (DRY)

Moisture	8%
Protein	21%
Fat	10.5%
- Omega-6 fatty acids	2%
- Omega-3 fatty acids	0.5%
- Medium chain fatty acids	1.3%
Carbohydrates	51.5%
Crude fibre	2%
Taurine	1986 mg/kg
Zinc	14.9 mg/100g
Vitamin A	21920 IU/kg
Vitamin E	301 IU/kg
Metabolisable energy (ME) ¹	3638 kcal/kg

KEY NUTRIENT VALUES* (WET)

Moisture	74.3%
Protein	6.2%
Fat	3.7%

Metabolisable energy (ME) ¹	940kcal/kg

INGREDIENTS (DRY)

Corn starch*, hydrolysed soya protein**, minerals, coconut oil, sugar*, rapeseed oil, cellulose, soya oil, fish oil.

*Purified carbohydrate sources

**Protein source

INGREDIENTS (WET)

Pea starch, cellulose*, hydrolysed soya protein**, fish oil, soybean oil, minerals, various sugars*.

* Carbohydrate sources.

** Hydrolysed protein source.

EN GASTROINTESTINAL*

- Acute or chronic gastrointestinal disease:
 - Acute or chronic diarrhoea
 - Gastroenteritis and colitis
 - Malabsorption and maldigestion
- Exocrine pancreatic insufficiency (EPI)
- Inflammatory bowel disease (IBD)
- Lymphangiectasia
- Pancreatitis
- Hyperlipidaemia
- Hepatic disease not associated with encephalopathy

KEY BENEFITS (DRY)

- Low fat*** - to help minimise fat maldigestion.
- MCFAs** - with a special fat source (coconut oil) high in Medium Chain Fatty Acids (MCHA) for easy gut absorption.
- Low residue** - easy to digest ingredients to help reduce workload of the compromised gut.

*Compared to the other products of the PURINA® PRO PLAN® VETERINARY DIETS range.

INGREDIENTS (DRY)

Rice*, Corn, pea protein*, dried poultry protein*, dried beet pulp, digest, soya protein, coconut oil* (4%), minerals, pork fat, mono and diglycerides, soya oil, fish oil, chicory inulin.

*Highly digestible ingredients

INGREDIENTS (WET)

Pork heart, poultry liver and heart, egg powder, rice, minerals, coconut oil, cellulose powder.

OM OBESITY MANAGEMENT

- Obesity and weight management
- Weight loss for diabetic dogs
- Fibre-responsive diseases such as:
 - Constipation
 - Hyperlipidaemia
- Fibre-responsive colitis

KEY BENEFITS (DRY)

- High protein** - to help promote loss of fat while maintaining muscle mass¹.
- Low calorie** - to help with weight loss.
- Glucose control** - Low Glycaemic Index carbohydrate sources to help nutritionally manage diabetes mellitus¹.

¹ Dry formula.

KEY NUTRIENT VALUES* (DRY)

Moisture	7.5%
Protein	29%
Fat	6%
- Linoleic acid	1.5%
Carbohydrates	41%
- Starch	23.1%
- Total Sugars	1.7%

Metabolisable energy (ME) ¹	568 kcal/kg

INGREDIENTS (DRY)

Corn*, soya meal*, dried poultry protein, barley*, wheat gluten, pea hulls*, cellulose, digest, minerals, pork fat.

* Carbohydrate sources

INGREDIENTS (WET)

Pork heart and liver, poultry heart and liver, cellulose powder, flour rice, minerals, sugar.

NF RENAL FUNCTION*

- Chronic renal insufficiency
- Hepatic disease associated with encephalopathy
- Conditions that require restricted dietary sodium
- Reduction of urate*, cystine* and calcium oxalate urinary stones formation
- Early stage of heart disease
- Renal failure associated to leishmaniasis

*Dry formula

KEY BENEFITS (DRY)

- Low level of phosphorus to help slow the progression of chronic renal insufficiency**
- Restricted but high quality proteins to help minimize the loss of muscle and toxins formation.**
- Omega-3 fatty acids to help minimise glomerular hypertension and help support natural anti-inflammatory processes***

*Dry formula

INGREDIENTS (DRY)

Corn*, rice*, dried egg*, dried whey*, pork fat, sugar, digest*, dried beet pulp*, minerals, soybean oil, fish oil.

* Protein sources

Urine alkalisising substance: calcium carbonate

INGREDIENTS (WET)

Pork (liver, heart), turkey by products, rice flour, corn meal, egg powder, minerals, pork fat, fish oil, sunflower oil, various sugars.

DRM DERMATOSIS*

- Inflammatory or allergic dermatoses
- Flea bite allergy
- Adverse reactions to food
- Otitis externa
- Skin construction and maintenance
- Inflammatory bowel disease (IBD)

KEY BENEFITS

- Skin support** - increased¹ levels of specific nutrients to help support skin health.
- Low antigen** - selected and limited number of protein sources to help minimise skin reactions to food.
- Omega-3 fatty acids** - increased² levels of omega-3 fatty acids, beneficial for skin health.

¹ versus FEDIAF nutrition guidelines

Metabolisable energy (ME) ¹	4002 kcal/kg

INGREDIENTS

Corn starch, rapeseed meal*, pea protein*, dried herring protein*, pork fat, digest*, minerals, rapeseed oil.

*Protein sources

DM DIABETES MANAGEMENT

- Diabetes mellitus
- Insulin-resistant dogs
- Weight maintenance after weight loss

KEY BENEFITS

- Glucose control:** formulated for the nutritional management of diabetes
- Low level of carbohydrates** to help limit postprandial hyperglycaemia
- Contains amylase inhibitor** from white bean extract to help reduce carbohydrate digestion

KEY NUTRIENT VALUES* (DRY)

Moisture	7.5%
Protein	37%
Fat	12%
- Omega-6 fatty acids	2.1%
- Omega-3 fatty acids	0.4%
Carbohydrates	29.5%
- Starch	18.5%
- Total sugars	1.5%
Crude fibres	7%
Vitamin E	481 IU/kg
Metabolisable energy (ME) ¹	3420 kcal/kg

INGREDIENTS

Dried poultry protein, barley*, corn*, soya meal*, pea hulls*, corn protein meal*, pea protein, pork fat, digest, dried beet pulp*, cellulose, fish oil, minerals, white bean extract (0.1%, source of amylase inhibitor).

*Carbohydrate sources

UR URINARY*

- Dissolution of sterile struvite stones
- Dissolution of bacterial-associated struvite stones in combination with appropriate antibiotics
- Prevention of recurrence of struvite stones
- Management of calcium phosphate uroliths (formation and recurrence)

KEY BENEFITS

- Controlled pH** - Promotes an acidic urine to help urinary struvite stone formation and promote dissolution.
- Moderate protein** - to help minimise substrate availability for urease-producing bacteria.
- Grat taste** - Highly palatable for long term feeding.

KEY NUTRIENT VALUES AND PARAMETERS* (DRY)

Moisture	7%
Protein	22%
Fat	15%
Carbohydrates	49.1%
Crude fibres	1.5%
Calcium	0.7%
Phosphorous	0.7%
Sodium	0.2%

Metabolisable energy (ME) ¹	3983 kcal/kg

Urinary pH..... 5.8-6.2

INGREDIENTS

Corn, wheat flour, dried poultry protein, rice, pork fat, corn protein meal, digest, dried beet pulp, dried egg, minerals, fish oil.

Urine acidifying substances: calcium sulphate, phosphoric acid

HP HEPATIC

- Liver Failure/disease
- Hepatitis
- Portosystemic shunt
- Copper metabolism disorder
- Piroplasmosis/babesiosis
- Leptospirosis
- Leishmaniosis
- Hepatic encephalopathy

KEY BENEFITS

- **Selected protein sources** to help reduce accumulation of toxins and maintain liver function
- **Restricted copper** to reduce hepatic copper accumulation.
- **High energy content** to help maintain a positive energy balance.

KEY NUTRIENT VALUES* (DRY)

Moisture	7.5%
Protein	19.0%
Fat	18%

Total copper	0.5mg/100g
Zinc	20.8 mg/100g
Metabolisable energy (ME) ¹	3903 kcal/kg

INGREDIENTS

Corn**, dried egg*, soya meal*, dried beet pulp*, pork fat, digest*, minerals, fish oil, coconut oil, dried chicory root, cellulose.

* Protein sources.

** Highly digestible carbohydrate sources.

3 kg

CN CONVALESCENCE

- Critical care nutritional support
- Peri-operative nutritional support
- Nutritional stress including:
 - Lactation
 - Malnutrition

KEY BENEFITS

- **High concentrations of essential nutrients**
- **High energy density** to provide energy for recovery (60% energy from fat, 36% from protein).
- **High digestibility** formulated with highly digestible ingredients.

KEY NUTRIENT VALUES* (WET)

Moisture	77%
Protein	10.9%
- Arginine	0.58%

Carbohydrates	0.9%
Crude fibres	0.1%
Zinc	4.3 mg/100g
Vitamin A	30805 IU/kg
Vitamin E	200 IU/kg
Metabolisable energy (ME) ¹	1134 kcal/kg

INGREDIENTS

Meat and animal derivatives (pork and turkey)*, fish and fish derivatives (salmon)*, minerals, fish oil*, sunflower oil*, corn starch, various sugars.

* Highly digestible ingredients

195 g

CC CARDIOCARE

- Chronic cardiac insufficiency
- Mitral valve conditions (Myxomatous Mitral Valve Disease)
- Heart murmur

KEY BENEFITS

- **Cardiac function** - Improves cardiac function in dogs with mitral heart murmur.
- **Helps support cardiac insufficiency** - Helps to support heart with compromised mitral valve function.
- **Cardiac Nutritional blend** - Contains Cardiac Nutritional Blend composed of Amino Acids, Omega-3 fatty acids - Medium Chain Triglycerides oil, minerals and vitamin E.

KEY NUTRIENT VALUES* (DRY)

Protein	26.5%
Fat	15%
Carbohydrates	39%
Lysine	2.02%
Methionine	1.4%

Taurine	2000 mg/kg
Omega-3 fatty acids	0.7%
(EPA+DHA)	
Sodium	0.18%
Magnesium	0.15%
Potassium	0.6%
Metabolisable energy (ME) ¹	3687 kcal/kg

INGREDIENTS

Rice, dried chicken protein, corn, barley, corn protein meal, medium chain triglycerides (MCT) oil (5%), dried beet pulp, dried salmon protein, cellulose, fish oil, minerals, pork fat, digest.

3 kg

NC NEUROCARE

- Brain function
- Age-related cognitive decline

KEY BENEFITS

- **Brain function** - Formulated with MCT and neuroprotective nutrients, clinically proven to help enhance canine brain function.
- **Cognitive function** - Specially formulated to help support cognitive function in senior dogs. Visible results in 30 days.
- **Containing MCT (medium chain triglycerides)** - Ketogenic diet providing an alternative source of energy for the brain.

KEY NUTRIENT VALUES* (DRY)

Moisture	7.5%
Protein	30%
Fat	15%
Carbohydrates	38.5%

Selenium	0.053mg/100g
Vitamin B	340.7mg/kg
Metabolisable energy (ME) ¹	3919 kcal/kg

INGREDIENTS

Corn, dried poultry protein, wheat flour, dried salmon protein, medium chain triglycerides oil (6.5%), dried beet pulp, rice, dried egg, corn protein meal, digest, fish oil, minerals.

3 kg and 12 kg

JM JOINT MOBILITY

- Joint mobility
- Healthy dogs predisposed to joint disorders

KEY BENEFITS

- **Joint support** - formulated to help support dogs with decreased joint mobility.
- **Omega-3** - increased omega-3 fatty acids to help improve joint mobility.
- **Antioxidants** - Increased antioxidants vitamin E and C to help reduce oxidative stress.

KEY NUTRIENT VALUES* (DRY)

Moisture	7.5%
Protein	30%

Carbohydrates	41%
Crude fibres	2.5%
Glucosamine+	2000 ppm chondroitin
Vitamin E	814 IU/kg
Metabolisable energy (ME) ¹	3724 kcal/kg

INGREDIENTS

Rice, dried salmon protein, dried poultry protein, wheat flour, soya protein powder, corn, dried egg, digest, fish oil, pea hulls, pork fat, minerals, cellulose.

3 kg and 12 kg

FortiFlora

- Gastrointestinal disturbance and loose stools associated with microflora imbalance
- Loose stools associated with stress, antibiotic use or diet change
- Reduction of flatulence in dogs
- Poor faecal quality in dogs of all ages (puppies, adult and senior)
- Palatability enhancement for dogs with poor appetite

KEY BENEFITS

- **Contains live lactic acid bacteria to help support intestinal health and balance. Contains a guaranteed level of a proprietary microencapsulated strain of viable probiotic (SF68) (5 x 10⁸ CFU/g).** The microencapsulation process enhances stability, guaranteeing levels of live beneficial bacteria entering the gastrointestinal (GI) tract
- * CFU: Colony Forming Units
- **Proven to help promote a strong immune system** and help support intestinal health and balance for dogs of all ages
- **Great taste**

KEY NUTRIENT VALUES* (SACHETS)

<i>Enterococcus faecium</i> SF68 NCIMB 10415 (4b1705)	Live micro-encapsulated microorganisms* Min. 5x10 ⁸ CFU/g
Protein	54%
