SUPPORTS BRAIN FUNCTION**

NC NEUROCARE™

PURINA®
PRO PLAN®

**HELP YOUR CLIENTS DETECT
COGNITIVE DECLINE
EARLIER**

Do they get lost in familiar places?

Are they showing more signs of fear?

Are they less active?

Have their sleep patterns changed?

As dog grows older, it can be hard to differentiate the normal signs of aging from the start of advanced age-related cognitive decline.

**Try the
PURINA® PRO PLAN® Canine
Cognitive Assessment Scale®**

Detecting age-related cognitive decline earlier helps your vet start management strategies that can help slow the progression.
